

Kervintz Noel

Stoughton, MA | kervintznoel@outlook.com | 786-923-6596 | kervintznoel.com | github.com/kervcodes

PROFESSIONAL SUMMARY

Professional with 7+ years of IT and software engineering experience, including production reliability engineering at a Fortune 100 insurer and independent full-stack product development across Next.js, React, React Native, Node.js, and AWS. B.S. in Computer Science from Boston University. U.S. Citizen, eligible for Public Trust clearance. Comfortable across the stack: frontend, backend, cloud infrastructure, and CI/CD.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, React Native (Expo), Next.js, Tailwind CSS

Backend: Node.js, Express, REST APIs, Prisma ORM

Cloud & Infrastructure: AWS (Lambda, API Gateway, DynamoDB, CDK), Supabase, GitHub Actions, CI/CD

Data: PostgreSQL (schema design, indexing), DynamoDB

PROFESSIONAL EXPERIENCE

Technology Associate (SRE) | Liberty Mutual Insurance

August 2022 – June 2025, Boston, MA

- Built and maintained REST API integrations across internal and third-party systems, enabling reliable cross-team data sharing in a production environment serving millions of users.
- Owned CI/CD pipeline configuration and improvements, reducing deployment friction and supporting faster, safer release cycles.
- Automated repetitive operational tasks and built monitoring/alerting pipelines, improving system reliability and SLA compliance.
- Led structured incident response for production issues, coordinating across engineering teams to diagnose and resolve problems quickly under pressure.

Hack.Diversity | Software Engineer Fellow

Boston, MA | January 2022 – August 2022

- Built a React application enabling physicians to submit structured radiology reports for COVID-19 patients, collaborating in an agile team of 9 engineers using sprint-based delivery.
- Developed a REST API endpoint supporting patient record updates; participated in weekly sprint reviews and iterative code walkthroughs — demonstrating agile delivery practices in a client-facing healthcare context.

Brown Rudnick LLP | User Support Specialist

Boston, MA | June 2019 – November 2021

- Administered and supported iManage Work, Aderant Expert, CompuLaw, CPI, IPDAS, and Intapp across a 7-office legal environment (Boston, New York, Miami, Hartford, London, Paris) — managing integrations, permissions, and cross-system troubleshooting at enterprise scale.

PROJECTS

Tidywaro — Full Stack Mobile Application — Independent Project

- Building a cross-platform wardrobe management app from scratch using React Native (Expo), with an AI-powered clothing analysis feature.
- Architected a freemium subscription system end-to-end, integrating RevenueCat (Apple IAP) and Stripe through a unified Supabase backend.
- Owned the full product lifecycle: ideation, architecture, development, and App Store submission pipeline.

opsboard — Internal Tooling Platform — Independent Project

- Developed a full-stack internal operations dashboard using Next.js, Prisma, and Supabase Postgres.
- Designed and resolved backend data-layer configuration across a modern ORM and managed Postgres deployment, applying clean, maintainable architecture patterns.

EDUCATION

B.S., Computer Science

Boston University
