

Kervintz Noel

AI Engineer — Applied GenAI, Agents & Production Reliability

Stoughton, MA | +1 786-923-6596 | kervintznoel@outlook.com | linkedin.com/in/kervintznoel | kervintznoel.com

PROFESSIONAL SUMMARY

Engineer who ships production AI applications with the operational discipline of an SRE background. Deployed an OpenAI tool-calling agent end to end — lead capture, provider-error handling, rate limiting — released through a GitHub Actions CI pipeline. Twelve years in technology, four of them in software engineering and AI systems, including two and a half years of 24x7 production reliability at Liberty Mutual Insurance. Works across the stack — React/Next.js front ends, Python APIs, data pipelines — and iterates with eval-driven discipline: failure-mode taxonomies, error-budget thinking, and quality signals before shipping. Currently deepening RAG, agentic workflows, and MCP for production use. B.S. Computer Science, Boston University.

TECHNICAL SKILLS

- Python & APIs: Python, REST API design and integration, FastAPI/SQLModel backends, TypeScript/JavaScript, SQL.
- Production AI: OpenAI API tool-calling agents, prompt design and guardrails, provider-error handling, rate limiting, evaluation and testing discipline (pytest), CI deployment (GitHub Actions, Hugging Face Spaces).
- Agentic AI & MCP (in progress): Tool-using agent workflows, RAG patterns, LangGraph/LangChain concepts, Model Context Protocol.
- Cloud & CI/CD: AWS (Lambda, API Gateway, DynamoDB, CDK, CloudWatch), Docker; GitHub Actions, Bamboo.
- Reliability & Operations: 24x7 incident response, root-cause analysis, runbooks, Datadog and BigPanda monitoring.
- Customer-facing delivery: Cross-team collaboration, stakeholder presentations, scoping prototypes with business users, third-party platform evaluation (iManage, Aderant, Intapp).

PROFESSIONAL EXPERIENCE

Independent Engineer Jun 2025 – Present

Self-directed · Boston, MA

- Shipped an AI "Digital Twin" assistant end to end: OpenAI tool-calling agent with lead capture, unanswered-question flagging, graceful provider-error handling, and rate limiting; deployed on Hugging Face Spaces via a GitHub Actions pipeline (Python, Gradio, uv). Live at kervintznoel.com/twin.
- Building the Bank Statement Analyzer: local-first Electron/React desktop app with a FastAPI/SQLite backend; deterministic multi-bank PDF parsing (PyMuPDF) with PII kept on-device via a privacy gateway (SQLModel, Alembic, pytest, Ruff).
- Founded BranchBeacon: assess small-business systems, identify an expensive bottleneck, and build a working prototype with the customer to prove value before scoping an implementation; deepening RAG, agentic workflows, and MCP on real project work.

Technology Associate, Site Reliability Engineering Jan 2023 – Jun 2025

Liberty Mutual Insurance · Boston, MA

- Built a diagnostic REST endpoint (AWS API Gateway + Lambda) to investigate 403/500/503 errors in a production incident-forwarding service, giving responders a repeatable way to reproduce failing calls; backed with pytest suites.
- Operated in 24x7 incident response across cloud services, APIs, and event-driven systems, coordinating with application, platform, and business teams to assess impact and drive resolution.
- Migrated CI/CD for 15 repositories from Bamboo to GitHub Actions and led a Python 3.11 to 3.12 runtime upgrade (ruff, pytest, tox, AWS CDK assertions); managed Datadog monitoring with synthetic checks and tiered alerting via Slack, BigPanda, and ServiceNow.

Cybersecurity Intern → Technology Associate Jun 2022 – Dec 2022

Liberty Mutual Insurance · Boston, MA

- Assessed a broken M&A tracking workflow, designed a multi-user React app to replace it, and presented it to managers and the product owner for approval; built Jira intake workflows for cross-functional teams.

User Support Specialist Jun 2019 – Nov 2021

Brown Rudnick LLP · Boston, MA

- Supported legal-tech applications across 6 offices; evaluated, integrated, and escalated with third-party vendor platforms (iManage, Aderant, Intapp); coordinated with stakeholders on firm-wide rollouts.
- Prior: IT support roles, 2014–2018 (Massachusetts College of Art and Design; Hamilton Brook Smith Reynolds).

EDUCATION

Boston University — B.S. Computer Science, May 2023 | Teamtreehouse — Full Stack JavaScript Techdegree, Feb 2021

General Assembly — Front-End Web Development Certificate, Feb 2019 | Ecole Supérieure Infotronique d'Haiti — A.S. Computer Science, Jul 2010
